

## Ah – the Land Downunder!

It is a land of extreme diversity both in wildlife and in scenery. From the stunning Great Barrier Reef, to Sydney Harbour with all its iconic symbols to the huge red monolith known as Ayers Rock or to give it its Aboriginal name “Uluru”.

What most people don’t realize is that Australia is as big as the continental United States. Most visitors to Australia concentrate on the major cities of Sydney, Brisbane and the Gold Coast and Cairns and Tropical North Queensland. A lot of this choice is probably driven by advertising but part of it has to be a matter of time. Even with a planned 3 week vacation to Australia, it is almost impossible to experience anything but the major highlights of the East Coast.

Each of the states has something to offer that is unique and different from one another. Did you know that Western Australia also has stunning offshore reefs teeming with

marine life and huge very unusual desert rock formations that rival those found in the “Red Centre” or that Victoria has beaches just as large, white and beautiful as the Gold Coast?

We have redesigned our brochure this year to highlight each state focusing on the most popular regions within those states and priced in some of the “must see” experiences in those regions. Why? Because we felt it would be more helpful to those planning a trip to provide a selection of travel IDEAS rather than a catalogue of hotel and day tour pricing. We used our expertise to create packages that we would recommend to our own families.

If you don’t see exactly what you are looking for – no worries mate – just ask one of our specialists – they will be more than happy to customize your dream trip to Downunder.
